

Corporate Project Management & Research-Based Consultancy

Who We Are

Ocean Strategy is an advisory practice providing corporate project management and research-based consultancy services to organisations and HNWIs who require assistance in the formulation and implementation of strategic corporate development projects and policy-based initiatives.

“Daniel has excellent organisational and project management skills. Daniel turns teamwork to an enjoyable experience with his enthusiasm and motivation. I have specifically appreciated his availability and professionalism during stressful situations.”

— Dr. Fateme Weyeneth, Legal & Compliance Manager - February 2016

Our Approach

Ocean Strategy operates as a network of independent professionals and corporate partners to form an experienced multi-disciplinary team capable of delivering solutions tailored to our clientele's needs.

Our typical assignments revolve around governance and strategic corporate development, addressing challenges in corporate infrastructure and operational efficiency, public relations, advocacy and business development strategies.

Very often this entails fluency in disparate disciplines, big-picture thinking and the ability to frame the right questions in a timely manner.

Different scenarios require us to provide different business services that have been packaged in the following solutions:

- Corporate Services & Project Management
- Business Planning & Development Strategies
- EU Funding & Incentives Advisory
- Industry Reports
- On-site Seminars & Workshops
- Event Hosting & Moderation

Thanks to our flexible and nimble approach, clients engage us to assist them in driving initiatives in start-up, post merger and acquisition scenarios. As a result we are often working alongside C-suite executives, directors, senior partners and ultimate beneficial owners.

Our Solutions

Corporate Services & Project Management

We specialise in planning and implementing complex corporate programs to help you meet challenges and exploit opportunities with the audacity of action. We are driven to understand your specific project issues, help you mobilise resources and establish resilient solutions. Our typical assignment involve operations that include multi-disciplinary teams, often based in different jurisdictions and driving initiatives in organisation development, start-up, post merger and acquisition scenarios.

Business Planning & Development Strategies

Equally experienced in private and public sector planning and development strategies, our clients engage us for our critical assessment and object-oriented advisory. This collaborative approach to planning and strategic development is designed to enhance our clients' ability to anticipate and leverage the factors of turbulence to their advantage.

EU Funding & Incentives Advisory

Whether you are heading a new venture or an established business, we can help you identify possible sources of funding designed for SMEs and non-governmental organisations. Depending on the nature of the business and the development initiatives to be undertaken, our clients often qualify for one or more of the numerous fiscal and monetary incentives that include co-funded EU grants, tax credits and loan guarantees.

Industry Reports

We provide market research facilities to our client base in select industries including financial services, tourism, telecoms and transport. Engaging experts from diverse fields of practice, we assist our clients by providing tailor-made research solutions to gather the required intelligence and enhance our clients' ability to stay ahead of the curve.

On-site Seminars & Workshops

We work alongside C-suite executives and directors to develop bespoke seminars and workshops. Our typical assignments revolve around governance, strategic corporate development and policy analysis, addressing challenges in operational efficiency and corporate infrastructure, public relations, marketing and business development strategies. In so doing, we help our clients engage in a deliberate effort of capacity building enabling them to navigate well in open waters.

Event Hosting & Moderation

The interest in the facilitation of multi-party dialogue ties in with our wider appreciation of public policy and the symbiotic relation this has to anything else that happens around us. Irrespective of what we choose to do for a living, policies provide the framework within which we operate, conduct our business and lead our quotidian lives. It is from this standpoint that we are committed to assisting our clients to facilitate dialogue, shape visions, generate ideas, advocate worthy causes, analyse policy and find practical solutions to small and bigger challenges alike.

Industry Experience

With experience in a number of industries and successful engagements in multiple jurisdictions, we have developed an effective framework of analysis and pragmatic action-planning to help us stay ahead of the curve and navigate in open waters.

- Diversified Financial Services
- Government & Public Sector
- Metals & Mining
- Media, Movies & Entertainment
- Telecommunication Services
- Transport & Logistics

“Daniel is an energetic, insightful, inspiring young professional. His ability to make people excited and take action is remarkable!”

– Dr. Morgan R. Clevenger CFRE, Senior Executive - July 21, 2016

Why Ocean Strategy?

OS provides its clients with:

- Flexible resource solutions that can be leveraged in busy cycles and project-based initiatives

- Capacity to implement development initiatives based on multi-industry experience

- Critical ability to question deep-rooted beliefs and assumptions to drive higher-value solutions

- Access to a growing global network and established local understanding

About Ocean Strategy

Owing to the founder's Mediterranean heritage, the Ocean Strategy brand is evocative of the challenges and opportunities that the world's oceans and seas have presented from time immemorial.

Over the centuries, people have had to learn how to successfully navigate these bodies of water and developed expansive networks of communication and trade that connected areas and regions the world over.

It is from this standpoint that at Ocean Strategy, we developed effective frameworks of analysis and pragmatic action-planning to help our corporate clients stay ahead of the curve and navigate in open waters.

Ocean Strategy operates as a network of independent professionals and corporate partners to form an experienced multi-disciplinary team capable of delivering solutions tailored to our clientele's needs.
